

PennHIP Report

Referring Veterinarian: Dr Beth Crandall
Email: bethkcrandall@gmail.com

Clinic Name: Heritage Animal Hospital Nibley
Clinic Address: 2365 South Heritage Drive
Nibley, UT 84321

Phone:
Fax:

Patient Information

Client: Crosland, Amanda
Patient Name: Lucy
Reg. Name:
PennHIP Num: 197716
Species: Canine
Date of Birth: 27 Jan 2022
Sex: Female
Date of Study: 17 Jan 2024
Date of Report: 15 Feb 2024

Tattoo Num:
Patient ID: 17381
Registration Num:
Microchip Num:
Breed: CAVALIER KING CHARLES SPANIEL
Age: 24 months
Weight: 16.8 lbs/7.6 kgs
Date Submitted: 14 Feb 2024

Findings

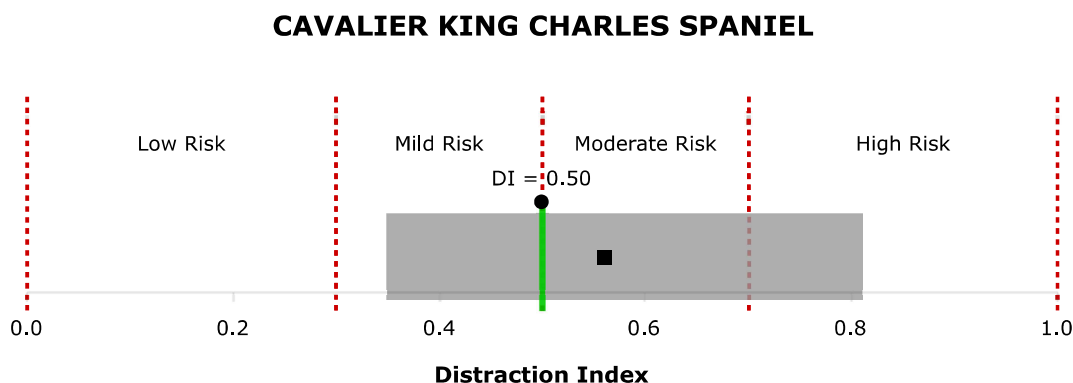

Distraction Index (DI): Right DI = 0.44, Left DI = 0.50.
Osteoarthritis (OA): **No radiographic evidence of OA for either hip.**
Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.50.

OA Risk Category: The DI is between 0.50 and 0.69. This patient is at moderate risk for hip OA.

Distraction Index Chart:

BREED STATISTICS: This interpretation is based on a cross-section of 712 canine patients of the CAVALIER KING CHARLES SPANIEL breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.35 - 0.81) for the breed. The breed average DI is 0.56 (solid square). The patient DI is the solid circle (0.50).

SUMMARY: The degree of laxity (DI = 0.50) falls within the central 90% range of DIs for the breed. This amount of hip laxity places the hip at a moderate risk to develop hip OA. **No radiographic evidence of OA for either hip.**
